SVCPUL

Description:

Svcpul is a digital platform used by service seekers to locate a desired service provider within a given locality. Service providers register their services and are located by service seekers using Google Maps and other contact details like telephone and email.

Uses:

- Easy location of desired service providers within a given locality
- Online tracking integration
- Emergency panic button
- Selling and marketing of services/merchandise
- Advertising

Advantages:

- Wide market and exposure
- Used by both current customers and prospects
- Convenience
- handy
- Time saving
- Fast and secure
- Readily available pool of service providers
- Modern

How to get Registered:

Download 'svc pul' app from Play Store and install it on your phone. 'Open the app', fill the fields, accept the 'terms and conditions', and click 'Register'. You will be prompted to re-enter your email address and password, and click ' Login '. Now you are ready to search a service on 'svc pul'.

Locating a Service Provider:

- Click on 'svc pul' on your phone. When the app opens, click 'View All', and select a desired service provider category. Enter radius in km (eg 5, 10, 50, etc). This is the distance from the searcher to the farthest distance desired.
- Registered service providers of the selected category within the desired radius will appear in orange pointers. The first click on the pointer, identifies the service provider. The second click on the identified service provider displays contacts, website and detailed description of services offered.
- Click on the phone icon to call, or email address to send an email, or website to visit the website of the searched service provider.
